Re: Price Adjustment Notice – Massachusetts Clean Energy Standard

Dear Customer,

NextEra Energy Services is dedicated to keeping customers informed about their electric service. We are writing to inform you about regulatory changes in Massachusetts that will affect the cost of electricity for customers receiving service through the Town of Sudbury's ("Town") Community Electricity Aggregation Program ("Program").

The Massachusetts Executive Office of Energy and Environmental Affairs and Massachusetts Department of Environmental Protection recently finalized amendments to Massachusetts' Clean Energy Standard regulations. These amendments result in a new clean energy requirement that applies to electricity sales in Massachusetts, beginning in January 2021. Compliance with the amended regulations increases the cost of providing your electricity supply. In accordance with the Town's agreement with NextEra Energy Services, the additional costs associated with these amended regulations are being passed through to customers who receive service through the Town's Program.

The price of electricity for customers who receive electric service through the Town's Program will increase by \$0.00083/kWh. This price increase will apply to bills issued on or after **DATE**. The new price for electricity, including the price increase, is shown in the table below:

<u>Default Program</u>	<u>Price per kWh</u>
Sudbury All Green (100% RECs including 15% additional Local RECs)	\$0.10712
<u>Optional Program</u>	
Sudbury Basic (No additional RECs)	\$0.10048
Sudbury Premium One Hundred Local Green (100% Local RECs)	\$0.13805

Disclaimer: Future savings compared to Eversource's basic service prices are not guaranteed.

If you have any questions concerning this change, please contact us at 855-639-8174. We appreciate you and thank you for choosing the Town's Program for your electricity supply needs.

Sincerely,

Massachusetts Community Choice Power Supply Program Administrator
